

Aging In Place

Powered by: **Mobility eXchange**

Mobility Exchange integrates both smart home and **telehealth** solutions to enhance everyday living activities of seniors.

Telehealth solutions focus on the well-being of senior residents and alerts healthcare providers if vitals or biometrics are not within the acceptable range.

Challenge:

Currently, there are 11 million elderly people living on their own, most of whom prefer to live independently despite declining health condition or being in need of some form of monitored care.

Solution:

From telehealth services to remote patient monitoring, biometric health information can be easily communicated electronically, making it simple to monitor a patient from the comfort of their own home. Mobility Exchange offers a simple and affordable, all-encompassing solution for home health monitoring.

RPM (Remote Patient Monitoring) can include a **Glucometer, Blood pressure, Pulse oximeter, Scale, Heart rate/REM sleep mat** to monitor patient

Telehealth allows the patient to meet with their care provider without the discomfort of leaving their home

Mediik Health is a mobile platform that syncs RPM devices with caregiver EMR's as well as allowing for Live Video

Telehealth & RPM

Benefits:

- Improved healthcare among older adults
- Ability to live a more independent lifestyle
- Patients served at home cost less than assisted living
- Smart technology features
- HIPAA Compliant Software

Aging In Place

Powered by: **Mobility eXchange**

Mobility Exchange integrates both **smart home** and telehealth solutions to enhance everyday living activities of seniors.

Smart home solutions are built around providing everyday comfort and safety to its residents. This includes items such as tracking and monitoring temperature of the house, and auto locking / opening doors to auto shutting off stoves.

Smart Home Technology & Connected Devices

Smart Home Devices

Keep patients comfortable and safe while receiving care at home using:

Auto/Remote Shut Off Stove: to stop accidental fires

Auto/Remote Door Locks to keep patients safe and secure

Auto/Remote Thermostat to regulate comfort inside the home

Mediik Health can also be used a central hub to control and set smart home devices.
