

Mobility eXchange

Asset Tracking

Mobility Exchange offers an affordable solution that remotely monitors temperature while tracking the whereabouts of controlled units with real-time reporting.

Excellent for

- **Manufacturing spaces:** Reduce time spent locating materials, tools and equipment
- **Hospitals:** Improve patient care and reduce wait time when equipment is located quicker; Cost savings
- **Logistics companies:** Stay on top of cargo and delivery times
- **Schools:** Track lab equipment, books, laptops
- **Rental companies:** Reduce theft in rental companies
- **Disaster Management:** Locate necessary items and deploy quickly
- **Construction Companies:** Tracking and management of worksite assets—workers

Benefits

- Geographic boundaries (Geo-Fences)
- Real-time location reporting
- Historical data graphs and set sampling
- Tracking portal
- Text or email alerts
- Worldwide coverage

How it works

A mobile device encompassing tracker, datalogger and cellular connectivity all in one compact package is attached to an asset that needs to be tracked. A near real time coverage is available on a tracking portal or an application that houses data for reporting and analytics of the valuable data produced.
