

COVID-19 - Mobile DETECTION SOLUTION

MOBILEDETECT BIO

INCREASED THROUGHPUT

- Up to 96 tests in one tube for rapid sampling
- All heaters take a single 30 min cycle for analysis of up to 96 tests
- 96 or 960 test capacity in a single portable case
- Only detects ACTIVE COVID-19 infections even if still asymptomatic
- Easy-To-Determine results: Red (Negative) or Yellow (Positive)
- Uses commonly available nasal or oral swab

Only test kit to achieve 100% accuracy on FDA EUA submission testing.

The MobileDetect app links results with time, date, location, patient info, pics, etc...
Send PDF reports via email or text

Mobilization Through Modulization:

- Customizable on-site testing
- Scalable for small to large volumes
- No on-site build required, self-contained utilities
- Medical information stored securely onsite
