

Digital Forms

Powered by: **Mobility eXchange**

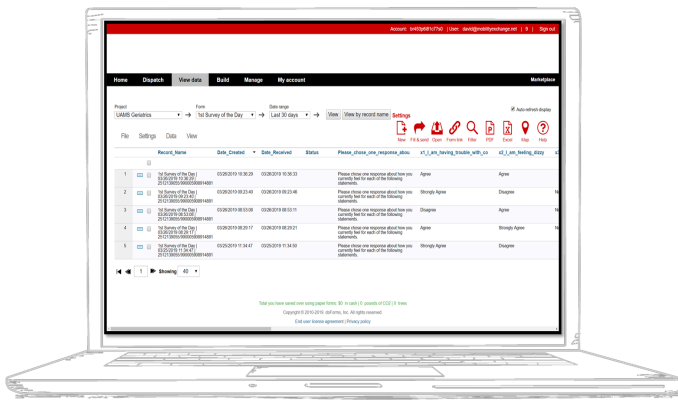

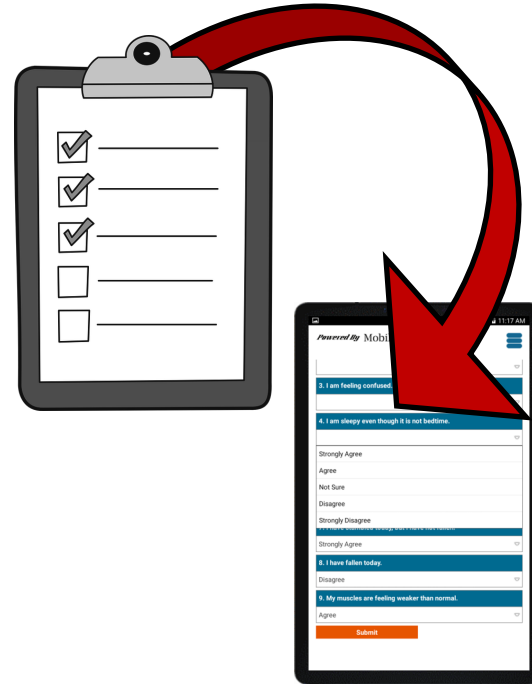

Mobility Exchange's Digital Forms solution offers an advanced data capture system that limits mistakes and streamlines manual processes. Digital Forms can be useful for reporting, analyzing and understanding trends.

Challenge:

Manual forms are easily misplaced, often filled out incorrectly or need to be entered into electronic systems for storage or reporting. These processes are inefficient and time consuming.

Benefits:

- Platform contains a secure environment for forms and data collection
- Results in decreased form intake time and errors
- Increases ROI by reducing errors on form processing
- Integrates into current data storage system

What's Included:

- Easy-To-Use, secure, mobile form application
- Custom built assessment, intake, survey or any other form used by your organization
- Form management portal to host and edit all forms
 - Set access to forms based on needs
- Access to data for analysis and reporting
 - Includes tracking and monitoring of forms used in the field
- Setup and training on the Digital Forms devices and portal
- End user support
- Fixed monthly pricing

Optional Add-Ons:

- Device that is locked down through Mobile Device Management
- Device is protected from break or loss with MobilityCare
- Managed services system for ordering and tracking devices
