

Healthcare Assistant Chatbot

Powered by: **Mobility eXchange**

Mobility Exchange's chatbot (Quincy) is an all-in-one communication solution. Quincy can be used to engage patients proactively, share and capture care-related information while improving quality of care, cost and patient satisfaction.

What's Included:

Built for care continuum

Links to your EMR system

Secure and "App-Less" messaging

Customized to your practice

Fits in all healthcare environments

Proactive and efficient care engagement

Benefits:

- HIPAA compliant and appless system that integrates with your EMR
- Robust and customizable to your exact needs with support from Mobility Exchange every step of the way
- Increase patient engagement while lowering unmet medical needs and costly follow ups
- Powerful learning engine (AI) to support your practice and capture care related information
- Assist with Scheduling, Intake, Wayfinding, Outpatient Monitoring, Surveys, Billing and more
