

Virtual Visit

Powered by: **Mobility eXchange**

Delivering remote care is often challenging. Mobility Exchange's Virtual Visit gives you instant and secure access to your patients anytime. This HIPAA compliant Telehealth system makes scheduling and connecting with patients easy and efficient.

Benefits:

- Simple to use platform that integrates with your EMR
- HIPAA compliant and app-less system
- Can be billed at the same rate as an in-person visit
- Validate your visit with electronically signed post-visit surveys
- Can be used on personal device, or integrated into Mobility Exchange's Population Health platform

*Since the pandemic, there has been a **50%** increase in remote visits.*

Once inside the Virtual Visit room, the patient can be engaged. Satisfy face-to-face requirements with secure video conferencing. You can also send messages or documentation within this secure environment.

Starts with a text message to the patient with a secure link to initiate the session. This launches the Virtual Visit room.

Finish the appointment with a post-visit survey or care summary the patient can electronically sign with their finger; all within the Virtual Visit room.
