

Digital Displays

Powered by: **Mobility eXchange**

Keep visitors informed or entertained with Mobility Exchange digital displays coupled with our content management solutions that provides remote, centralized control of all your displays wherever they are installed.

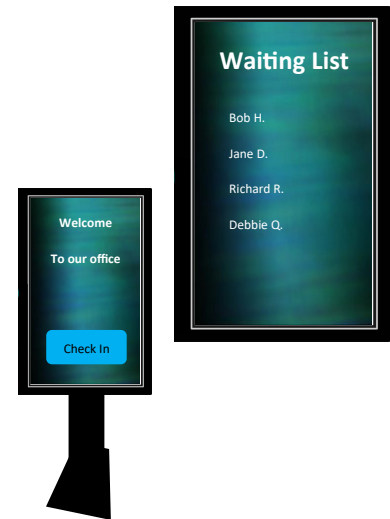

They can be used to display: interactive content, check-ins, location maps and wayfinding, advertisements and more.

Kiosk:

Check in visitors through an interactive kiosk. This platform allows you to load preliminary questions to expedite the check in process and route a visitor to the appropriate person. A waiting list can also be displayed with wait times.

Benefits:

Enhance visitor experience by reducing wait times and expediting visitor processing through an automated system. Analytics can be pulled to create higher efficiency with check in/out.

Interactive Display and Wayfinding:

Show building residents, maps, advertisements and more. Keep display up to date from one centralized control system.

Benefits:

Eliminate missed or late appointments by giving visitors an easy to use interactive map.

Advertise:

No need to upload content to individual screens. Advertise across multiple displays with the same content from one centralized control system.

Benefits:

Universal message displayed on all digital displays without the hassle of uploading content individually.
