

Electronic Driver Logs

Powered by: **Mobility eXchange**

With the Federal Motor Carrier Safety Administration's (FMCSA) ELD mandate officially in place as of September 29, 2020, Mobility Exchange assists clients and their truck drivers to track trip details electronically for record keeping and compliance purposes.

Key features are:

- Real-time GPS tracking
- Push alerts and notifications
- Tracking in-transit hours
- Real-time violations reporting
- All drivers are assigned unique identification number
- Idle time tracking

Benefits

- Fuel efficient GPS routes
- Improved Productivity
- Improved Quality and Accuracy
- Lower bottom line cost for goods shipped
- Greater Visibility

How it works

Mobility Exchange has developed a locked-down, custom platform for ELOGs that encompasses an end-to-end driver and vehicle inspection workflow. Equipped with a user-friendly dashboard, our device is designed to track and execute all the features listed above, while also providing real time re-orting. Additionally, the system is equipped with a secure web browser, personalized by the customer, to allow or block specific websites or content on the device.
