

COVID 19 Vaccine Assistant Chatbot

Powered by: **Mobility eXchange**

Mobility Exchange's COVID 19 Vaccine Assistant Chatbot helps reduce the costs associated with providing vaccines to your patients by efficiently managing scheduling, patient consent forms, educational material and even ride-share services.

What's Included:

Dynamic COVID FAQ's

Digital Consents

Self-Scheduling visit

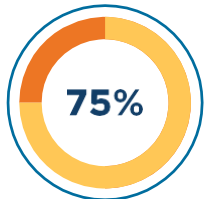

Proof of Vaccination

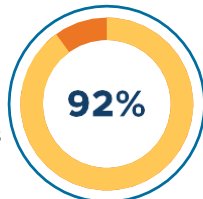

Link to rideshare services

Simple and quick setup

75% of clinicians' report improvement in clinical workflows by implementing automation.

92% of people who are given the option to self-schedule will adhere to their vaccine plan.

100% of the information you share to educate your patients on vaccine options can be automated.

The average un-reimbursed cost of treatment per COVID-19 patient.

Challenges:

- Promotion of vaccine events
- Scheduling of vaccination appointments
- Automatic reminders for time sensitive booster shots
- Education around vaccine effectiveness and safety
- Reducing unreimbursed cost of care

Benefits:

- Can engage with thousands of patients in a matter of minutes
- Reduce daily call volume by half with a single chatbot
- Frictionless experience for both patient and staff
- Reducing the Unreimbursed Cost of Care

Providers handling the challenges of vaccine distribution are turning to AI-driven conversational chatbots to address key communication and engagement challenges.
