

Secure Messaging

Powered by: **Mobility eXchange**

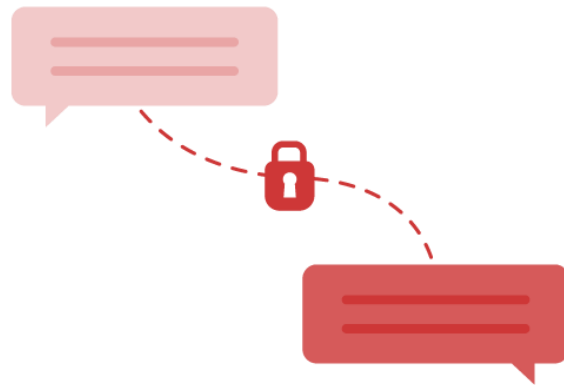

Mobility Exchange's Secure Messaging application provides real-time, secure, HIPAA compliant healthcare communication between team members and patients, to facilitate effective collaboration that integrates into your EHR system.

Benefits:

- Connect doctors and nurses on one easy to use collaboration tool
- Can connect one on one, in a group or send broadcast messages
- Send texts, images and files with confirmation of receipt
- Keep patient on track From Pre-Admission to post-discharge
- Frictionless experience for both patient and staff
- Encrypted and secure messaging
- Can be used on your own mobile device (BYOD), desktop or with Mobility Exchange protected platform for added security

True collaboration starts here!
